Description:

Eekels Ship Repair & Service department recently repaired the flooded forecastle on Wijnne Barends vessel “Kirsten”

The flooding happened during rough sea and damaged several essential systems such as bowthruster and emergency generator.

The bowthruster motor and firefighting pump were overhauled, and the generator replaced. The bowthruster cabling from main switchboard to forecastle and all internal fore ship cabling was renewed.

The bowthruster starter cabinet and several starter cabinets were renewed and installed.

After 6 days of repair and successful commissioning the vessel was handed over to its owner again.
